

Reconstruction of Airport Entrance Road – Southeast Iowa Regional Airport Authority

Proposed recipient:

Southeast Iowa Regional Airport Authority
2515 Summer Street
Burlington, IA 52601-3327

Requested amount:

\$2,484,000

Explanation of request:

The funding would be used for reconstruction and stormwater improvements for the Airport entrance road. Currently, the existing storm sewer infrastructure is undersized which causes flooding and has damaged parked vehicles at the airport. The reconstruction of the entrance road has been planned by the Airport for several years, but due to limited funding and increasing construction costs, the project has not yet been funded. This project proposes to reconstruct the Airport entrance road, make stormwater improvements, improve commuter safety to and from the airport, connect Airport to adjacent City bike trail, and provide the community with a lasting impression for its visitors.
